Glory to Isotope!

by [MiaQc](#)

Summary

One-shot. Mireille, a follower of the Atomicata cult, jumps into the "wonder hole". Glory to Isotope!

- A translation of [Gloire à Isotope!](#) by [MiaQc](#)

Mireille is a follower of the Atomicata cult.

Although she would never use the word "cult" to describe them.

For her, they are a big family.

A big family of Atoms and their supreme leader, the mysterious Deborah Currie.

Mireille visits them every day and spends her money.

For Isotope's Glory!

Isotope is such a mysterious god.

Only Deborah Currie can communicate with Him.

But He's better than all the deities on Earth!

Isotope promotes gender equality, science, and knowledge from everyone.

All He asks is to be worshipped.

And to obey Deborah Currie if you're an Atom.

Mireille would love to be an Atom.

But Deborah Currie has other plans for her.

The cult leader shows Mireille the "wonder hole."

"All those who jump into this hole receive the blessing of our Great Isotope!" She told her.

Her words filled Mireille with wonder.

To receive His Blessing, Mireille, smiling, jumps into the hole.

And Deborah Currie laughs as she hears the sound of bones breaking.

Another sacrifice for Him.

Glory to Isotope!
